Signed: _____ Date: _____

** FOR OFFICIAL USE ONLY **

APPROVED: _____ PERMIT#: _____ ORDINANCE NO: _____

REJECTED: _____ VARIANCE REQUIRED: _____

ZONING PERMITS

All applications for development must be submitted to the Zoning Officer for review before building permits can be issued. The applicant must submit a copy of the property survey along with a completed and signed zoning application before the review process can begin. If the project involves an addition to the residence or an accessory structure, the survey should show the size of the project, distances to the property lines, the distance to the residence, and all impervious coverage on the property. If the application involves a home occupation or interior renovation, a floor plan showing the change must accompany the application.

PLANNING A HOME PROJECT? It is wise to contact the office regarding permits before you start. Some retailers give incorrect information telling customers permits are not needed, when they are, putting you at risk for a violation.

There is a fee required prior to the issuance of a zoning permit. If work is done without a permit there may also be additional penalties, which may include issuance of a summons for work done without a permit. Occasionally, a permit cannot be approved by this office because it requires review and approval from the Land Use Board. In those instances, following submission and review of the zoning application, a letter will be sent informing you that you need an additional approval and how to proceed.
